

GENERAL INFORMATION

The Eos motorized fader wings may be used to provide extended playbacks for Eos Ti, Gio, Ion, Eos/Ion RPU's, RVIs, ETCnomad (PC or Mac native) and ETCnomad Puck.

Up to three wings may be attached to any of these devices. There are two wings – a x10 and x20. The x10 has 10 60mm motorized faders, two 4.3" full-colour high-resolution displays and three control buttons. The x20 adds 10 additional faders, two more displays and three control buttons. The wing provides power sensing and automatically turns on when both an active USB data connections and mains power are provided via the external 12V power supply.

Connected devices must be running Microsoft Windows 7 or higher or Mac OSX Mavericks or later. These wings are NOT compatible older devices based on Windows XP.

FEATURES

- Playback layout consistent with Eos Ti and Gio
- Either 10 or 20 pageable playbacks (100 pages are supported)
- Paging/bank conventions are determined in a setup menu
- Button/fader and configuration mapping displayed via full-color high-resolution displays.
- Two powered USB ports
- VESA 100x100mm mountable
- Kensington Lock compatible attachment point

INTERFACES

- AC Input (100 – 240VAC at 50/60Hz) with external power supply
- Two USB ports
