SMART, EASY AND EFFICIENT MAINTENANCE TOOL FOR THE MOVING HEAD FIXTURES

Claypaky, a leading supplier of entertainment solutions, is introducing CloudIO - the first digital maintenance solution that enables easier, faster and more precise remote diagnostics and maintenance of moving head fixtures.

Diagnosing fixture issues consumes valuable time and resources. Especially when managing hundreds or thousands of fixtures in your shop and out on tour. There must be a better way to quickly identify fixture problems, collect and record fixture data, and perform routine firmware updates. Claypaky's CloudIO is a cloud-based innovative, state-of-the-art tool capable of managing all these maintenance processes more efficiently and accurately.

www.cloudiobox.tech

The CloudIO is an IoT device which provides technicians with complete diagnostics for most Claypaky fixtures in a user-friendly and convenient way. The CloudIO is a very compact device, equipped with a 7-inch capacitive touch screen and easy to understand menus. It has two in/out pass-through DMX connections, so it is possible to interface with and communicate with up to 31 lights connected to the same DMX line. This is useful for rental companies, who can connect their lights to the CloudIO when they return from a tour to see what lights may have issues or update their firmware.

BENEFITS AT A GLANCE

- **EASY AND FAST ACCESS TO ALL INFORMATION**: automatic overview of all fixture information and one click firmware update.
- **LIVE REMOTE ASSISTANCE**: technical support staff can view fixture information/status remotely in real time.
- **CLOUD DATA AND PREVENTIVE MAINTENANCE**: all data is stored in the cloud, so it is always available. Predictive maintenance available based on CloudIO's data analysis.
- **USER FRIENDLY**: a user-friendly graphical user interface provides immediate fixture information and suggestions for addressing fixtures issues.
- **MORE FLEXIBILITY**: all parameters from the connected units can be checked collectively, individually or in groups, as required, including lamp life, firmware update, error diagnostics, DMX settings, batch overview and maintenance procedures.
- **MORE SAVINGS**: thanks to all its features, CloudIO saves you the time and resources needed to perform scheduled and unscheduled maintenance of your Claypaky fixture inventory.
