MR35 12V MR11 Pattern and Framing Projector

A low voltage, compact pattern and framing projector that produces intense sharp or soft edged beams of light. The integral 12 volt transformer accepts the energy efficient MR11 lamps. The MR35 boasts a precision lens system that produces narrow or wide beam spreads within the same fixture housing.

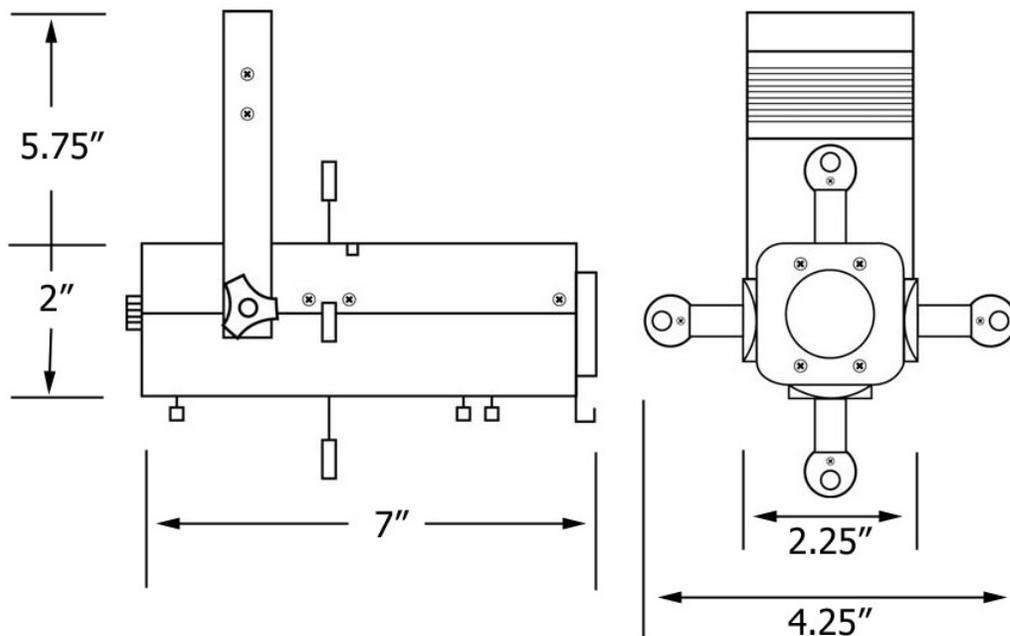

With its built-in pattern slot the MR35 is capable of projecting custom or stock patterns. The four integral framing shutters allow for precise geometric beam shaping. The MR35 is ideal for picture lighting, pattern projection, and creating precise circles of light.

FEATURES:

- 12 Volt Electronic Transformer
- Accepts Long Life Low Voltage MR11 Lamps
- Variable Lens System
- Stainless Steel 4 Way Framing Shutters
- Built-in Pattern Slot
- Numerous Mounting Options
- Energy Efficient

Manufactured in the USA - IBEW
UL Listed

Product Number: MR35
Product Reference: Framing Projector
Typical Throw: 5 - 15 Feet
Lamp Base: GZ4
Lamp Reference: MR11
Weight: 3 lbs
